

AI INFRASTRUCTURE READINESS CHECKLIST

Is your enterprise ready for the road to
AI?

This checklist can help you gauge your
readiness across compute, storage,
networking and data.

	Yes ✓	Partially ⚠	No ✗	Notes
Compute Infrastructure We have modern GPU-capable systems.				
Storage Architecture Our data platform supports high-performance workloads.				
Networking We can handle high-speed data transfer for AI workflows.				
Data Management Our data is accessible, clean, and ready for training.				
Security & Compliance We meet governance standards for data residency.				
Cloud & Hybrid Strategy We leverage both cloud and on-prem infrastructure.				
Scalability Plan We have a clear roadmap toward an AI Factory.
